

INTERNET OF THINGS INTEGRATION

Introducing IOTI's OneTouch Mobile Application

Logistics focused app allowing for calls with OneTouch

Call by Touch OneTouch

Easy access to important contacts, directly via the OneTouch app. Just touch the appropriate button and connect to the programmed contact

Less is more Convenient

The OneTouch was developed to ensure easy access to streamlined communication, whilst ensuring that drivers and staff members remain focused on the task at hand, creating a safer environment

No Undesired Call Costs

Limit mobile calls to only pre-programmed numbers applicable to your operations, thus limiting mobile costs and improving cost control measures

Emergency service on request

Let your drivers and staff members access emergency services from the OneTouch app, conveniently, promptly and swiftly

A solution designed to increase output, reduce costs and provide a simplified, yet effective method of communication

INTERNET OF THINGS INTEGRATION
